

Glasgow City Region City Deal

Procurement Activity Overview

The Glasgow City Region City Deal will fund major infrastructure projects; create thousands of new jobs and assist thousands of unemployed people back to work; improve transport infrastructure; drive business innovation and growth through the support of key sectors such as life sciences and generate billions of pounds of private sector investment. This will be delivered through a programme of 26 projects which will greatly add to the value of the local economy over the next 20 years. Projects are spread over three themes:

Infrastructure

A £1.13 billion fund will support twenty major infrastructure projects across the region for roads, bridges and improved transport infrastructure, quay walls, remediation, construction, public realm works, assisting further capital developments for housing, retail and commercial, and all of the supporting services to deliver these.

Employment and Skills

Three labour market projects will help to address local employment challenges:

- **Working Matters** - A £9 million employment scheme to support individuals in receipt of Employment Support Allowance will work with 4,000 people, assisting at least 600 into sustained work.
- **Youth Gateway** - A £15 million integrated employment programme will work with 15,000 young people (aged 16 to 24) over the next three years, helping 5,000 into sustained work.
- **In Work progression** - A pilot labour market progression scheme to support the training and development of staff in low income jobs within the Care sector, boosting wages and reducing reliance on in-work benefits.

Business Growth and Innovation

Three projects to support the growth of small/medium sized enterprises and enhance the Life Sciences sector:

- £16 million funding for the development of the Glasgow University led Imaging Centre of Excellence (ICE) at the Queen Elizabeth II Hospital Campus will provide ground-breaking medical research and commercialisation facilities for clinical researchers and companies developing new products and services in the Life Sciences sector.
- The £4 million MediCity Scotland facility based at Euro Central Business Park will bring together academics, entrepreneurs, clinicians and business support services to boost the development of new healthcare services and medical technology, creating 150 jobs within new med-tech companies over the next five years.
- A new Centre for Business Incubation and Development in Glasgow's Merchant City will provide quality, flexible work spaces for growing small to medium sized enterprises and a highly focused account managed service from dedicated business advisers. The project will run over five years with £4 million in City Deal funding.

EIGHT PARTICIPATING LOCAL AUTHORITIES

Infrastructure Projects	Summary	Sub Projects	Anticipated Procurement Activity *	Approximate Funding	Lead Local Authority
M77 Strategic Corridor	Six key projects around the M77 including; commercial units, business incubation facilities, country park enhancements, employment links, improved surface transport connectivity and a new rail station.	<ul style="list-style-type: none"> • Lavern Works • Greenlaw Business Centre • M77 Junction 5 Barrhead • New Railway Station Barrhead South • Country Park Visitor Centre • Foundry Links 	Procurement Complete 2016 Design 2016, construction 2017 Procurement Network Rail managed Design 2016, construction 2017 2016	£44 million	East Renfrewshire
