Join us at our 'Meet the Buyer' event. Our procurement teams will be there to meet local suppliers and discuss the contracts that will be offered over the course of the construction project. See over the page for a list of some of the services that will be required.

The event is free of charge and open to all.

About the Project

Earls Gate Energy Centre, a new Energy from Waste (EfW) facility at Earls Gate Park, Grangemouth, will replace an existing gas-fired energy plant that has come to the end of its operating life. The facility will provide heat to local industry and also export electricity to the National Grid.

The centre will be built through a joint venture between CNIM and Clugston. CNIM will lead the process works and Clugston the civil engineering works. Once completed, it will be operated by MES Environmental, a subsidiary of CNIM.
